# We have broken ground!

Started  
Construction  
May 2021

Located between Abu Dhabi, Ruwais and Dubai industries. The new liquid and gases bulk terminal facility will not only prosper as a result of its strategic location, but will be further bolstered by Khalifa Port's multi-modal connectivity with access to the sea and UAE's extensive road and future GCC railway network.

Beyond the development of the liquid and gases bulk terminal facility, ACT is exploring different opportunities to expand its service offering at Khalifa Port and its surrounding environment. This expansion includes the facilitation of fuel bunker services for port customers, drumming and ISO filling services, the development of an independent laboratory, realisation of MARPOL slops reception facilities, ADR qualified trucking and distribution services, as well as offering stevedoring services that will support other liquid and gas product custody transfers.

## Our values

The ACT values are the foundation of our approach to business. It's vital that our employees, contractors and joint venture partners understand and share these values. Care for Safety, Health & Environment; Integrity; Team Spirit; Commitment; Agility.

Care for  
Safety, Health  
& Environment

Integrity

Commitment

Agility

## We are certified

Qualified by the industry

# What ACT does

Handle large marine tankers and smaller feeder barges.

Break-bulk large parcels into flexi-bags, drums and IBCs

Storage and buffering of liquid products in tanks and pipelines

Intermodal transport and transfer docks with ISO tanks to connect deep-sea container liners

Road transport with road-tankers to distribute products and connect industrial users with their plants

Decarbonize logistics and emission free supply chains with innovative product transfer equipment and environmentally sustainable operations.

## Operations

Handling of liquid bulk products

Nitrogen or reprocessing treatment to preserve products

Additives and dose injections to improve grades

Temperature control of sensitive products

Blending and mixing products to client's specifications

Loading and unloading of liquid product bulk vessels

## Products

Vegetable oils and oleochemicals

Bitumen

Liquid Gases

Petrochemicals and downstream products

Hydrocarbons and fuels

Speciality and niche chemicals

# What ACT offers

ACT recognizes the below types of chemical terminal users

## Hub

Hub activities to aggregate GCC Produced products to further distribute towards E/W

## Trading

Trading activities to support the import or export of products for domestic UAE clients or global traders

## Industrial

Industrial activities to link production facilities in industrial zones through either pipeline or road haulage

## Strategic

Strategic storage for defense purposes

## Bunkering

Fuel supply activities for ships calling Khalifa Port and wider region

# Facilities Specification

## First Phase

<b>Capacity</b>	100,000 cbm
<b>Plot</b>	50,000 sq. meters
<b>Tanks</b>	40
<b>Tank types</b>	Mild steel, stainless steel, temperature controlled
<b>Tank size</b>	2500 cbm
<b>Access</b>	Truck, vessel
<b>Berth depth</b>	16 meter
<b>Products</b>	All liquid bulk
<b>Services</b>	Product blending, heating, chilling nitrogen blanketing
<b>Logistics</b>	Breakbulk drumming, distribution with haulers, IBC or ISO filling
<b>Terminal</b>	Import and export of liquid products

## Second Phase

Construction upon market demand

<b>Plot</b>	Additional 150,000 sq. meters
<b>Tank types</b>	All types possible
<b>Tank size</b>	Any sizing possible
<b>Access</b>	Truck, vessel, pipeline to KIZAD, rail
<b>Products</b>	Any liquid or gaseous bulk
<b>Services</b>	Integral industrial import or export solutions

Contact us for any bulk liquid or gases support in the region
